

ESAKKIMUTHU VENKATESAN

SOFTWARE ENGINEER | FULL STACK DEVELOPER

esakkimuthu.v3701@gmail.com • +91-6379613252 • Bangalore, India

PROFESSIONAL SUMMARY

Innovative, self-directed Software Engineer with 2+ years of professional experience delivering world-class, mission-critical distributed systems and financial technology platforms using .Net, Java, Python, and React JS.

TECHNICAL SKILLS

Languages: C#, Python, SQL, C++, Java

Backend: C# .NET Core, ASP.NET Web API, Entity Framework Core, REST APIs, Distributed Services, Microservices Architecture

Frontend: React or Angular, TypeScript, HTML5, CSS3

Cloud and DevOps: Docker, GitHub Actions, CI/CD Pipelines, Azure or on-prem hybrid deployments

Databases and storage: SQL Server, MySQL, MongoDB, Redis, Query Optimization

Architecture and design: System Architecture, Distributed Systems, Fault-Tolerant & Scalable Architecture, Reliability Engineering, Design Patterns (Repository, Factory, DI)

Tools and practices: Git, Postman, Code Reviews, Agile/Scrum, Unit Testing, Integration Testing, Software Documentation, Source Control Management, Observability (metrics/logging/alerts)

Problem solving: 125+ LeetCode problems solved — Data Structures, Algorithms, Dynamic Programming

PROFESSIONAL EXPERIENCE

Infinite Computer Solutions — Bangalore, India

Software Engineer — CareSource | Mission-Critical HealthCare Application Development **Dec 2023 – Present**

2+ Years

- **Architected and developed 5 scalable, fault-tolerant REST APIs** for the CareSource Provider Portal and MyLife member portal using C# .NET, serving 20,000+ monthly active users with 99.9% uptime and zero critical production failures across release cycles.
- **Led Provider Portal, SecureForms, and MyLife portal development** to enable a new line of business across MA, NV, and MS, accelerating market entry and regulatory onboarding for three states.
- **Designed distributed storage, indexing, and query optimization strategies** that reduced average API response latency by 40% and improved throughput under peak concurrent traffic.
- **Delivered 15+ production-ready, secure forms** (SecureForms) for end users, implementing validation, accessibility, and audit logging to meet healthcare compliance requirements.
- **Migrated legacy member portal to MyLife portal**, consolidating authentication, profile management, and member workflows to improve user experience and reduce maintenance overhead.
- **Built automated CI/CD pipelines with GitHub Actions and Docker**, cutting deployment time from 2+ hours to under 15 minutes and enabling reliable weekly releases.
- **Established architecture standards, documentation, and coding guidelines**; mentored junior engineers on design patterns (Repository, Factory, DI), source control, code reviews, and unit testing to raise team quality and onboarding speed.

EDUCATION

Cambridge Institute of Technology, Bengaluru, India

May 2023

Bachelor of Engineering — Information Science | CGPA: 7.9 / 10.0

ACHIEVEMENTS & CERTIFICATIONS

- Received multiple client appreciation awards and monthly Spot Awards for consistently delivering innovative, world-class software products and creative solutions ahead of schedule in high-pressure development environments.
- Certifications: AWS Cloud Practitioner, Anthropic Claude AI, Generative AI Fluency
